

CO:RE is available on the BT Radianz Cloud.

CO:RE Collateral & Repo.

CO:RE (Collateral & Repo) is the real-time integrated securities finance offering powered and operated by SIX Securities Services. It brings together trading and collateral management capabilities in a fully-integrated value chain starting from trading through settlement and finally to collateralization at the CSD or custodian level. The need to drive efficiency, reduce risk and control costs has made an efficient collateral management offering essential for every market player and provides benefits for banks, broker-dealers, insurance firms, commercial banks and asset managers alike. Thanks to our relationship with BT Radianz, the combined services represent an unparalleled package.

BT Radianz

Managed Connectivity and Hosting for Financial Services.

Our Radianz Cloud is the leading connectivity platform for financial firms around the world. All technology, operations, and customer support are tailored to meet the requirements that financial services customers demand. The BT Radianz Cloud supports thousands of financial customer locations around the world, providing connectivity to over 400 of the world's leading financial service providers including brokers, exchanges, market data sources, analytics, clearing firms, and other financial services providers.

Contract Type in the CO:RE Trading System

Quote Entry on the CO:RE Trading System

BT Radianz Features

The unique design and capacity management of the Radianz Cloud results in low latency access to market data, trade execution, and trade cycle applications and services.

Advanced capabilities include BT Radianz Ultra, which provides low latency connectivity to market data, trade execution and trading partners in New York, London, Chicago and Paris. BT Radianz Proximity combines high-performance connectivity with fully-managed hosting facilities to offer the fastest access to execution venues around the world.

BT Radianz Venue Interconnect is a global, low-latency fabric providing connectivity between the world's major execution venues. BT Radianz Messaging ensures secure, reliable, tamper-proof and non-repudiable post-trade message delivery. BT Radianz consolidates all of a customer's external market connectivity onto a single connection, ensuring fast, secure, reliable access to trading partners and services across the trade cycle for all asset classes. BT Radianz connectivity is fully redundant, diversely routed to the customer site, and carries a 100% availability service level agreement (SLA).

The BT Radianz engineering team designs and manages all connectivity to ensure that customers have the capacity and resiliency needed to trade, settle and communicate with their counterparties. Connectivity is constantly monitored, so as market volumes grow or customer requirements change, BT is able to scale each customer's connectivity quickly and remotely. This unique, scalable design allows existing customers to connect to new services and trade counterparties as quickly as possible.

BT in Financial Services

We have been providing products and services developed specifically for the financial services industry for more than 30 years. As the leading networked IT services provider to the global financial community, we combine our core strength to design and manage solutions that meet your complex infrastructure and communications services requirements, helping you to reduce costs, improve efficiencies and better serve your customers.
